'Reorienting Indian Agriculture', by Raj Paroda, is now available as an Open Access eBook.

While the "Green Revolution" was a major success, many issues with food production and increasing population and climate change mean that countries such as India face major challenges. Paroda argues for choosing the best technologies and blending them with rich traditional knowledge to attain sustainable development goals.

"Dr. Paroda's magnificent book will inspire policymakers, researchers, the media and many others for years to come as they study the primary sector and agri-food value chains, and design and implement policies and programs for sustainable agriculture and food security for all. A rewarding read, warmly recommended." - Marco Ferroni, CGIAR
